

Durable Goods Orders — Points

Durable Goods Orders — Release Bar Range Stats

The Durable Goods Orders is released by US Census Bureau at 08:30 ET. This study measures how much NQ futures travel high-to-low on the 1-minute release bar — i.e. the full top-to-bottom move during the 60 seconds of the release.

Range 1m = the high minus the low (in NQ points) of the release-time candle.

Year-by-Year — Release Candle Range (1m)

Year	Count	Avg Range 1m	Max Range 1m
2018	2	2.4 pts	4.2 pts
2019	3	9.2 pts	16.2 pts
2020	1	16.0 pts	16.0 pts
2021	2	21.5 pts	30.0 pts
2022	5	26.7 pts	64.5 pts
2023	5	34.4 pts	60.2 pts
2024	8	30.3 pts	97.2 pts
2025	6	18.7 pts	26.8 pts
2026	2	35.4 pts	45.0 pts

Across **34 sweep-qualified setups** 2016–2026, average release-bar range was **24.2 pts** with a max of **97.2 pts**. This is the 1m candle volatility you must respect when fading the release.
